

Bid Pro Proposal and Bid Software

RFMS Bid Pro guides you through the bidding and estimating process by allowing the entry of estimates and estimate templates.

Overview

RFMS Bid Pro eliminates the drudgery of hand bids and estimates. Bid Pro was designed with the unique estimating and bidding needs of floor covering operations. As an added plus, Bid Pro is integrated with RFMS Order Entry and RFMS Products to eliminate unnecessary data entry duplication.

Builder Work

1. Use RFMS Measure to import floor plans and calculate areas
2. Export to Bid Pro to show "allowed" vs. "upgrade"
3. After a selection sheet is received and products adjusted, the bid is exported to Order Entry (add-ons, overages, upgrades) and Schedule Pro (installation scheduling)

Commercial Work

1. Use RFMS Measure for plan takeoffs and creating layouts
2. Export to Bid Pro to illustrate actual costs and apply appropriate profit margins
3. After bid is awarded, export to Order Entry to capture a Job Cost Baseline for future reference and tracking

Multi-Family Work

1. Use RFMS Measure to create templates of floor plans
2. Export to Bid Pro to create templates for all floor plans with available options
3. When a unit installation is requested, export the particular line items to create a bid
4. Print the bid as a PDF and email to management company for issuance of PO. Once received, export bid to RFMS Order Entry for inventory procurement, work order and pick ticket for staging and installation

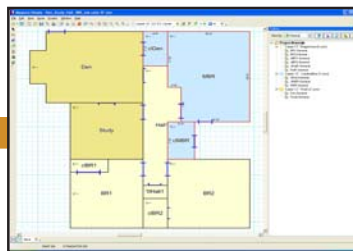

Flexible Bid Printing Options

- Print a comprehensive detailed bid or a summary bid
- Bid summary may be subtotaled by area or product
- Custom bid coversheets
- PDF or direct email capabilities for distribution

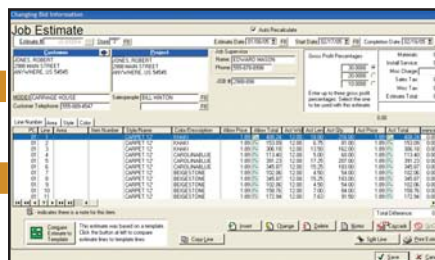

Snapshop Feature List

- Point & Click commands decrease bid preparation time
- Accommodates overhead and other cost factors
- Integrated with RFMS Order Entry and RFMS Products
- Quick copy of estimates and templates
- Actual and Allowed pricing
- Start and completion dates for job and line-by-line basis
