

## **VOLUNTEERS NEEDED:**

Flooring computer software developer RFMS is seeking 200 retailers who currently use QuickBooks and want to volunteer as beta testers for its Interact 2010. The new program, due out in June, is completely interactive with QuickBooks and allows dealers to supplement the accounting program with the RFMS operating system designed specifically for flooring stores, including product catalog, scheduling, estimating and more. It even looks and feels like QuickBooks, making for an easy and profitable learning curve. RFMS wants retailers to be certain it hasn't missed anything before fully releasing the software, because "It's software you built." Anyone interested in volunteering should visit [interact411.com](http://interact411.com) or email [mebstein@rfms.com](mailto:mebstein@rfms.com).
