

RFMS in the Cloud will floor you.

It's time to experience RFMS—the leading business management software for the flooring industry, in the cloud.

Always Up To Date and Secure

Get the latest RFMS features and security updates on demand. With two sets of enterprise grade firewalls and AI-based anti-virus security, your servers are constantly monitored and kept in a secure environment so that you – and you alone – have access to your data.

Add Microsoft Solutions

Upgrade to Office 365 for email, Intune for device management, Active Directory to automate network management and Microsoft Office to improve your productivity.

Save Time and Money

Get even more for your business with no new hardware or network set up required. Plus lower upfront costs to start using RFMS with reliable IT support from Isogent, boosts your businesses productivity from day one.

Always Yours

With RFMS Cloud, you're always in control of your data. We simply host it in a secure data center with reliable cloud service.

Always Backed Up

Your RFMS server is backed up in two different PCI, SSAE, HIPAA, FISMA, FERPA (and more) compliant data centers, in two different cities, on four different power grids, on five different internet providers, with four different battery backups (per site) and three different electric generator backups per site.

Customize Your Cloud Stack

Reap the benefits of competitively priced high-speed Internet and easily add VPN connections, file services, data backups, workflow and print or paperless solutions.

Access from Anywhere

If you're online, you're on RFMS. Access your services from any configured device with a simple login to the cloud, anywhere you are.

Maintain Flexibility

Get the latest updates and features from RFMS with a simple log in your cloud from anywhere. Customize your cloud services with SQL customizations and additional services.

Flexible Delivery Options

Access your cloud services via published application, remote desktop services, terminal server access, a Virtual Desktop (VDI) and even an iPad.

Basic hosting is included for FREE with an RFMS subscription agreement. Additional add-on options include:

- Email connection
- Microsoft Office 365 Pro Plus subscription
- Public IP Address
- RFMS Ministack – Private Server and Space Allocation
- RFMS User Setup
- Additional Workstation Setup
- Windows Application Hosting – Application and Access
- Addon Technology Services – Server Setup & Configuration

Workstation Computer Requirements:

Windows 10 Professional, Intel Core i7 2.0GHz or faster computer, 16 GB or greater RAM with a 7200RPM SATA hard drive, Business Class Internet (minimum up/down speed of 5mbps/16mbps is recommended), Current Windows Updates and Anti-Virus
