

# B2B

## B2B E-Commerce

B2B E-Commerce allows a flooring contractor to receive price/product catalogs, invoices and ship notices from a B2B enabled vendor. It also provides the ability to send a purchase order to the vendor directly from the RFMS system. This eliminates manual data entry, improves data accuracy and speeds up the processing of daily business documents for the flooring contractor.

## Web Services

Web services is a new and exciting technology that allows you to check the product information that is normally available on vendor websites without leaving your RFMS system. With a few clicks, you can check real-time inventory availability, current pricing and track order status\* with Shaw, Mohawk, Engineered Floors and many B2B distributors. Web Services is available in both RFMS and RFMS Mobile.

- **Stock Check** – available inventory for a specific item/SKU
- **Related Items** – available inventory for trims, accessories that coordinate with the base item
- **Price Check** - current price for an item based your current price agreement with vendor
- **Order Status** - list of last 15 - 30 orders (material assigned, shipped, invoiced, etc.)

\*Only certain vendors participate in Order Status at this time.

## Automate

- Download your supplier price list and import into RFMS
- Send purchase orders electronically and receive confirmations
- Download supplier invoices and process in RFMS
- Download supplier ship notices and receive with information from advanced shipping notice
- Automate daily business processes

## SEE WHAT OUR CLIENTS ARE SAYING

B2B enables our company to be one of the most operationally efficient businesses in the industry and allows us more time to devote to customers.
