

# New Home Management System Builder & Design Software

## Overview

A product developed for flooring contractors in the builder market, NHMS makes subdivision bidding and pricing easy and creates point-and-click design center selections and pricing. NHMS pulls products and labor rates from RFMS Products module and imports takeoffs from RFMS Measure. After the design center selections are made, exact material quantities based on home buyer selections are pulled from RFMS Measure and an order is generated.

## Design Center

Allows your design staff to coordinate all aspects of the product selection process.

- Schedule designer appointments
- Quickly select flooring, pad and non-flooring options
- Print color sheet for home buyer and builder
- Generate color floor plan in Measure with one click
- RFMS Order Entry imports from Design Center and includes material, labor, pad, special charges, participation and standard billing amounts broken out on individual lines

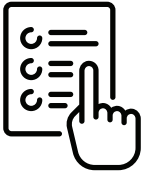

## Subdivision Projects

Organizes every detail of each job, including measurements and pricing information

- Integrate customer, products, labor costs and tax information from RFMS
- Import takeoffs from RFMS Measure
- Add non-flooring options
- Handles standard and upgrade price points
- Add disclaimers and proposal verbiage
- Generate bid reports and design center pricing

# NHMS Key Benefits

Point-and-click design  
center pricing and  
product selections

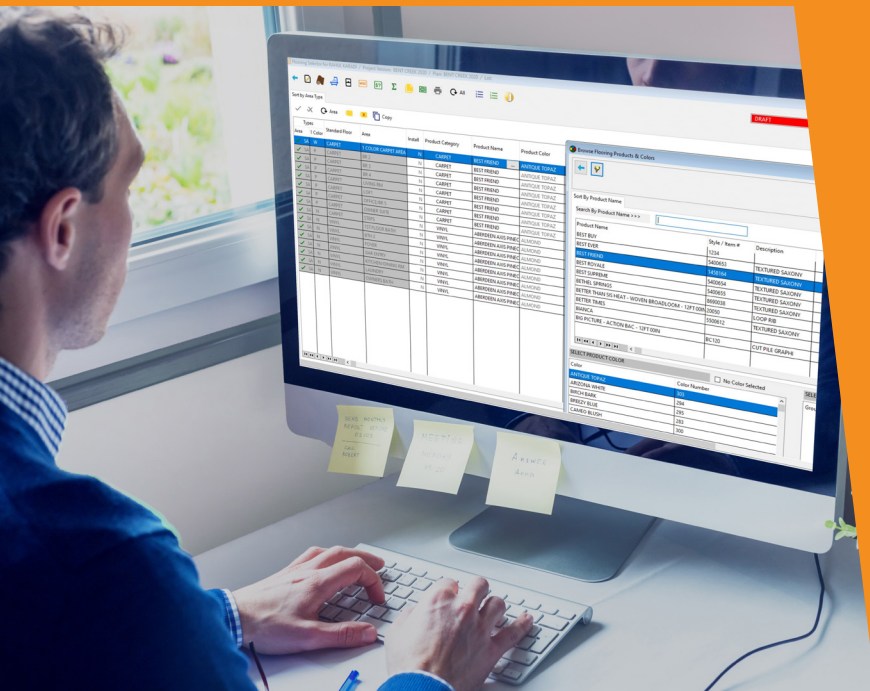

Eliminate multiple  
data entry points

Create color  
floor plans

Create bids for  
subdivisions in minutes

## Business Management

Detailed management tracking reports enable you to track employee productivity as well as product sales

## Ordering & Billing

Streamline data entry and improve purchasing accuracy by exporting lots/buyer selections into RFMS Order Entry

- Measure recalculates quantities based on actual selections by home buyer

## Product Information

Ensure up-to-date and accurate product specifications and costs through direct integration with the RFMS Products module
