

Built for efficient estimating

Whether you estimate flooring for commercial projects, residential, multi-family or new home construction, you need to efficiently and accurately perform takeoffs and provide professional bids to your clients.

Measure Desktop enables you to:

- Create more accurate estimates in less time
- Increase the efficiency of estimating and bidding
- Realize increased sales and higher profits

Measure Desktop fulfills your estimating needs

Accuracy

- ✓ Automatically calculate estimates and layouts of roll product while allowing total control over cut placement
- ✓ Calculate plank and tile quantities for both floor and wall surfaces, including complex tile designs for the largest commercial jobs
- ✓ Avoid underbidding by capturing all project details, including labor, transitions, base and other add-on products

Profitability

- ✓ Create low-waste estimates for all flooring types
- ✓ Close sales quickly with professional-looking bid documents
- ✓ Easily apply margin and overhead percentages to cost
- ✓ Reduce estimating time

Efficiency

- ✓ Sync with Measure Mobile for onsite drawing or measurement verification
- ✓ Integrate with RFMS business management software
- ✓ Collaborate with your team on the same projects using the shared project library
- ✓ Import graphic files (e.g., PDF, CAD, JPG) and automatically create rooms or trace them with the assistance of intelligent drawing tools*
- ✓ Change products with a single click to show multiple estimate options
- ✓ Design in 3D and 2D simultaneously

*Only available in Measure Premier

How does it work?

**Import the blueprint image
and create rooms***

**Search for and apply
materials to each room**

**Add project details such
as transitions or add-on
materials and services**

**View and edit the roll
plan as needed**

**View the worksheet results
(export to RFMS or print reports)**

*Only available in Measure Premier
